FROM THE HEGGIE FARM, WELCOME TO THE SIMMENTAL PORTION OF THE SALE!

I love this time of year. Bull sale catalogues come in nearly every day. Something different to read in the kitchen, T.V. room and bathroom.

As usual Murrey Jacobson of Bova Tech in Shaughnessy fed our bulls and as usual he did a very good job.

Our program, we feel has advanced this year with the purchase of the bull CMS Safari 20U from Czech-Mate Livestock, a breeder who tops most of the Simmental shows and sales. Our calving ease bulls are sired by Remington Red Label, HRD Willie and LFE Tanker.

If you are unable to join us on sale day, give us a call and we would be pleased to provide any assistance that you may require. Feel free to drop by Murray's before the sale and take a good look at the bulls. Thanks for attending!

Don & Roslynn & Family

Note - Prior to Sale Day, the bulls may be viewed at Bova Tech Livestock (Murray Jacobson's) at Shaughnessy, AB

Simmental EPD Explanation

PLEASE NOTE!! THERE IS NO CORRELATION BETWEEN SIMMENTAL EPD'S & RED ANGUS EPD'S!!

The numbers should not be used as a comparison of an animal of one breed to an animal of another breed. Below is a simplified explanation to help explain how to use the numbers within the Simmental breed.

EPD = Expected Progeny Differences

HOW TO USE THEM WITHIN THE CONTEXT OF THE SIMMENTAL INFORMATION PRESENTED IN THIS CATALOGUE

- CE: Calving Ease** - The higher the value indicates increased calving ease.
- BW: Birth Weight** - Larger value indicates heavier birth weights, lower value indicates lighter birth weight.
- WW: Weaning Weight** - Higher weaning EPD's predict higher weaning weights.
- YW: Yearling Weight** - Higher yearling EPD's indicate greater expected yearling weights.
- MCE: Maternal Calving Ease** - The larger EPD indicates a higher % of unassisted births for calves born out of this sire's daughters.
- MWW: Maternal Weaning Weight** - A larger EPD indicates greater weaning weight for the calves from the daughters of this sire.
- MM: Maternal Milk** - Larger numbers indicate more milking ability of a bull's daughters.

Simmental Breed Average EPD's:

| <u>CE</u> | <u>BW</u> | <u>WW</u> | <u>YW</u> | <u>MCE</u> | <u>MWW</u> | <u>Milk</u> |
|-----------|-----------|-----------|-----------|------------|------------|-------------|
| 5.0 | 2.1 | 33.9 | 58.6 | 1.5 | 22.9 | 5.9 |

The Breed Average EPD's are compiled from the total number of Simmental calves registered in 2008 and are the numbers to compare the bulls in this catalogue to.

The mother of this bull goes back quite a few years. Galant "Sis" was the great-grandam of this cow. Her calves always sold high at Agribition in Regina. 11U is a thick bull; very deep; and will produce those soggy steers. Plenty of meat and milk in his pedigree.

This bull is out of a good cow that we bought from Barry LaBatte; LaBatte Simmental from Gladmar, Sk. I liked this bull from the day he was born.

Sired by Safari he should give you heavy steer calves and beautiful replacement heifers. Safari calves have good hair coats and good temperaments.

Don't miss this one. He has a good future ahead of him!

It's A Matter of Perspective...

When it's snowing and blowing and your tractor has many objections to starting and you think life couldn't be any worse.... well ...

IT REALLY COULD BE!!

Besides, look what we have to look forward to when the snow goes! →→→→
